About ChinaLINQ

ChinaLINQ started to provide sourcing services in 2003. Our sourcing specialists have a range of working experiences from 10 to 20 years in import/export, product sourcing, manufacturing, engineering and quality assurance.

The combined knowledge and skill sets of our associates cover a wide range of industrial areas in both business and engineering. Our team of managing associates work from locations in the US and China. We serve US importers from all states and handle sourcing operations in all major cities in China.

We are well versed with business system, business culture and practice in both China and the US. Our industrial experiences come from our solid work history in import / export companies, manufacturers, carriers, freight forwarding and customs brokerage services.

We have an extended business network across the Pacific Ocean. Combined capabilities in business and engineering have become our great strength and the added-value to our clients. We have developed an advance business system in providing reliable and consistent solutions for sourcing products from China.
